

KL60 Robotic Dispensing

Compact Pharmacy Robot

The compact pharmacy robot that's perfectly sized for today's pharmacies - with FillSafe™ technology.

- The Kirby Lester KL60 manages prescription dispensing in medium to high volume retail, outpatient and central fill pharmacies – emphasizing safety, security and inventory control.
- Bring automated dispensing and inventory control to a new safety level with the FillSafe™ security system. Virtually eliminate any chance of medication mishandling during refilling and return-to-stock.
- 60 of your top medications are automated. That equates to 35% to 40% (or more) of the total daily orders of a retail or outpatient pharmacy. With the KL60, you automate only what makes sense (no “slow mover” medications to expire in the unit before they are dispensed).
- Less than 4 feet deep, the KL60 is compact and easy to install and use, yet provides the highest level of automation.

KL60 Benefits

Free up valuable time.

The KL60 automatically dispenses the bulk of your prescriptions automatically. Your pharmacy staff is freed up to concentrate on important priorities like customer service, adherence, MTM or other initiatives that help the pharmacy's efficiency, profitability and expansion.

FillSafe™: Built-in security for peace of mind during refilling.

The foolproof FillSafe™ security system prevents dispensing from a cassette that was not authorized by a pharmacist. FillSafe™ is an important advancement to an already safety-conscious system.

Industry-best accuracy and speed.

Drug-specific cassettes provide superior accuracy and speed; gravity-feed design and adjustable cassette speed avoid the pill-jamming and miscounting frustrations of error-prone hand-calibrated cassettes. Filled, labeled orders are processed in about 30 seconds.

Technicians prefer Kirby Lester's no-hassle robotics.

Maintaining the KL60 requires just minutes per day. Loading vials and medications is easy, and does not interrupt operation. Software interfacing to the pharmacy management system is seamless. Cassette adjustment or recalibration isn't needed.

Superior service and support.

Kirby Lester provides thorough on-site training with your staff. The KL60 has an industry-leading uptime record, and our top-level service and support ensures your KL60 operates efficiently and without interruption.

The KL60 high-speed system dispenses a pharmacy's 60 most-prescribed oral solids. All other medications are easily managed with a tabletop unit such as the KL1Plus, KL20 or KL30 for complete counting and verification assurance.

Also Available: KL100

For added efficiency, Kirby Lester's KL100 automates a pharmacy's top 100 medications (50% or more of total orders) in less than 5 feet.

KL60 Robotic Dispensing

Compact Pharmacy Robot

Fast dispensing is only part of the story –

A compact footprint and simple operation make the KL60 an indispensable technology solution for low-to-high volume pharmacies.

- Hassle-free robotics: Minimal maintenance and upkeep, easy-to-use software, and simple replenishment steps.
- Everything at the user's fingertips with a high-resolution touch-screen display.
- 3 user security levels with fingerprint/biometric scanning.
- Viewable and printable reports (20+). Print to a pharmacy printer or save on the network.
- Full 24 /7 support by Kirby Lester technicians. Industry-leading uptime and customer service. Video help onboard.
- Cassette usage reporting helps you determine dispensing trends to maximize the efficiency of your automation.
- Labeling: Pre-printed labels match your existing label design; print 1D and 2D barcodes; full menu of data and elements; select font, bold, italics, field locations.

KL60 Details

Labels, Counts, Fills: Presents a complete prescription in about 30 seconds.

Dimensions: 29"W x 78 1/4" H x 44 5/8"D, approx. 945 lbs. installed.

Vials: Accommodates many common vial types and two different vial sizes.

Vial Size: Small (either 13, 16 or 20 dram), and large (40 dram).

Vial Replenishment: Fast random load, no special magazine or inserting needed.

Cassettes:

- 60 Standard Cassettes: 6.5"L x 6.5"W x 4"H. Capacity: 650cc. Holds approx. 675 glipizide 10mg; 1,200 lipitor 20mg; 5,800 lisinopril 5mg; 410 metformin 500mg; 1,400 zolpidem 10mg. Cassette capacities may vary depending on manufacturer/size /shape of medication.
- Optional High-Volume Cassettes: 6.5"L x 6.5"W x 8"H. Capacity 2,200cc.

Cassette Replenishment: FillSafe™ security system prevents dispensing from a cassette whose refill or return-to-stock was not authorized by a pharmacist. Cassettes are automatically deactivated when removed. The KL60 also includes lot number and expiration tracking, and NDC scan-verification during refilling and return-to-stock.

Touch Screen: 15" color LCD

Pick-up Windows: 6

Printer: Direct thermal.

Power: Requires a dedicated standard 115V, 60Hz, 15A power outlet. Normal operation draws up to 300w/hr, not to exceed 500w.

Interfacing: Can interface with any pharmacy management system; can integrate with the Kirby Lester KL20 and KL30.

Operating System: Microsoft Windows 7

Software Features: Integrated dispensing system, manual dispensing, status, archiving and history, group cassettes, order prioritization, multi-vial dispensing, dispense statistics.

Installation: Simple to install. Roll into place, plug in and begin installation. Straight-forward training on-site in the pharmacy.

The KL60 accommodates standard cassettes (650cc) or high-volume cassettes (2,200cc).

Front console and touch screen are compact and user-friendly. Refilling cassettes is safe, efficient and fast.

Pharmacy technicians quickly find patient orders on the bright touch screen. Information for nine orders at a time are displayed.

FillSafe™ security system prevents dispensing from a cassette that was not authorized by an RPh.
