

Small price, small footprint.
Huge return on your investment.

Why are pharmacies automating with Kirby Lester?

Accurate

- Kirby Lester counting technology is the "gold-standard" of the industry
- Eliminate hand-counting forever
- Excellent for inventory counting

Affordable

- Powerful technology at a fraction of the cost of other automation
- Plenty of options - from simple counting to sleek robotic dispensing
- Realize a full ROI in months, not years
- Everything on your automation wish list

Reliable

- Trusted for 40+ years by 40,000+ customers in 40+ countries
- Track and report every prescription-filling detail
- World-class customer service and support
- Increase employee and customer satisfaction

Simple

- Compact and simple to install
- Learn how to use in minutes (for desktop devices) or in less than a day (for robotic systems)
- Track customer orders and prescriptions on a real-time basis
- Built-in barcode scanning and user tracking
- Fully automated workflow (on/off capability)

Greater Dispensing Accuracy, Improved Operating Efficiency and Lowered Costs

Only from Kirby Lester Counting and Dispensing Technology

Kirby Lester's full lineup of counting, dispensing and verification systems includes the **right technology for everyone** — from pharmacies processing 50 prescriptions a day to thousands per day. There is a Kirby Lester system for your business, whether you need the world's best-selling tablet counter, whether you want to eliminate dispensing errors, or whether you are ready to automate your entire prescription process with robotics and workflow software.

Kirby Lester is your trusted provider of a full line of **powerful** pharmacy automation that's **always** affordable!

Kirby Lester's Full Line of Pharmacy Automation Offers Options For Affordable Dispensing Safety

Are You Ready For Dispensing Automation?

If any of these challenges occur in your pharmacy, you may benefit from dispensing automation.

- ❑ Daily Rx volume is over 75 Rx
- ❑ Need a competitive edge
- ❑ Still hand-counting by 5's
- ❑ Concerned about dispensing errors
- ❑ Pharmacy insurance company suggested "risk-minimizing technology"
- ❑ Paid too much in taxes last year
- ❑ Pharmacists are dispensing medications, not technicians
- ❑ Want to free up time to grow business
- ❑ Don't use any verification software (barcode-scanning to check the stock bottle NDC with the order's NDC)
- ❑ Daily Rx volume is rising
- ❑ Hard to fill staff vacancies
- ❑ Pharmacy environment is stressful and strained
- ❑ Want to focus more on customer service
- ❑ Always wanted a pharmacy robot, but they were too expensive, too big, or too much hassle

KL1

Eliminate hand-counting. Save time and money – no overcounts or undercounts. Just pour and count, no calibration needed.

New KL1Plus

Based on KL1 (above). Count *plus* verify every order. Streamlined verification software alerts if the wrong medication, dosage or quantity is chosen.

KL20

100% *counting and error-prevention* system – your best defense against dispensing errors. Full workflow software, barcode verification, drug images, multiple checks/ balances, fingerprint sign-on, inventory tools and more.

KL30

Combines the robust functions of the KL20 (left), with hands-free cassette dispensing and unique double counting in only a few square feet. Automates your top medications. Ideal for narcotics control and 90-day fills.

KL60

29"W x 46"D x 78"H

New KL100

29"W x 59"D x 78"H

Affordable robotic dispensing options: The compact KL60 fully automates 35-40% or more of your total daily orders, while the midsized KL100 manages 50% or more (with FillSafe refilling security). The industry's only hassle-free robotics. Fast, efficient, simple, and safe.

Simple, Accurate Counting

100% Verification

Ultra-Fast Dispensing

Full Robotic Dispensing
