

KL1Plus

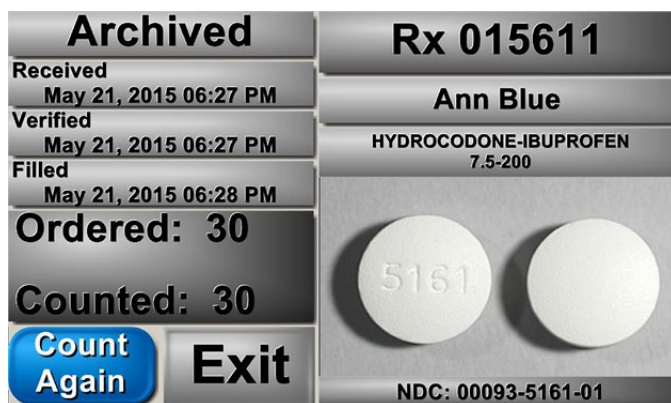

Software Screen Shots

Software guides the technician through the verification and counting process.

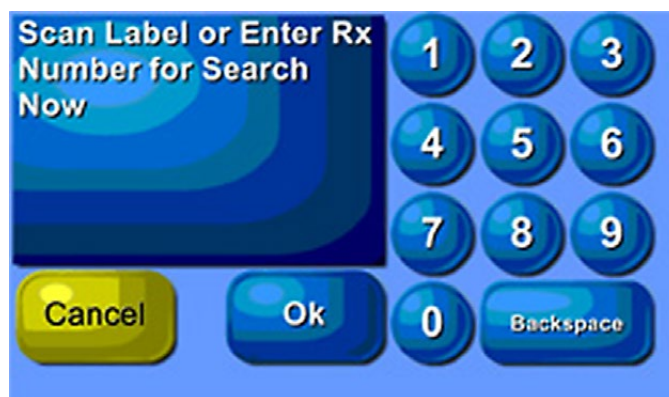

Catch "Near Misses": The KL1Plus alerts the user to the wrong medication, strength or quantity.

With two screen touches and one Rx label scan, proof of a filled prescription is instantly available with the "Find Rx" function.

KL1Plus

Archived orders include fill date and time, Rx number, NDC, patient name (if interfaced), ordered quantity and counted quantity.
